BRIDGEGAP™

by EcoPIVOT Technologies Inc.

Get one clean quote from up to three local contractors, follow clear updates on your phone, pay a deposit through a secure payment service, and deal with your contractor directly.

Prototype in build Phone app — internet-based and paperless

Port Alberni, Parksville, Qualicum Beach and surrounding areas, Vancouver Island, B.C.

EcoPIVOT Technologies Inc. · A product for customers in small towns. This document uses no personal contact details.

HOW IT WORKS

A fair quote, closer to home

In a small town, finding a reliable, insured contractor and a fair quote can take more time and trust than it should.

BRIDGEGAP™ gives you one clean quote from up to three local contractors in Port Alberni, Parksville, Qualicum Beach, and the surrounding area on Vancouver Island. The platform is fully internet-based and paperless. Your intake, the quote, the materials list, invoices, and bills are all digital. Because intake and quotes happen online and matching is local, there are also fewer driving trips, so less gas use and less traffic. These benefits are the basis for possible environmental incentives and offsets that are being explored and are not yet measured or confirmed.

1. **Tell us about the job**
   The work, where it is, what you need, and when.
2. **Up to three local contractors are invited to quote**
   Matching is by location, availability, and ability.
3. **You see one clean quote**
   Materials and labour, at the price the contractor sets.
4. **You pay the down payment**
   Payment goes through a secure payment service. EcoPIVOT never sees your card details.
5. **You and the contractor connect directly**
   Once it is paid, you get each other's contact details. From there, you work together. EcoPIVOT steps out.

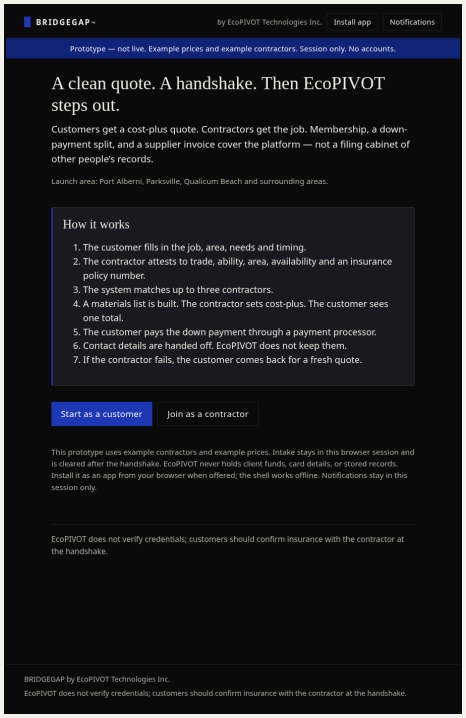

BRIDGEGAP™ is a phone app. You get a notification when a quote is ready, when a quote is accepted, when your deposit is paid, when the handshake is complete, and when a re-quote is available. Clear updates mean less chasing and less uncertainty — peace of mind while you wait — and steadier, more predictable work for the contractor.

> **Confirm insurance at the handshake**
> Contractors enter their insurance policy number on their honour. EcoPIVOT does not verify credentials. You should confirm insurance with the contractor when you first connect.

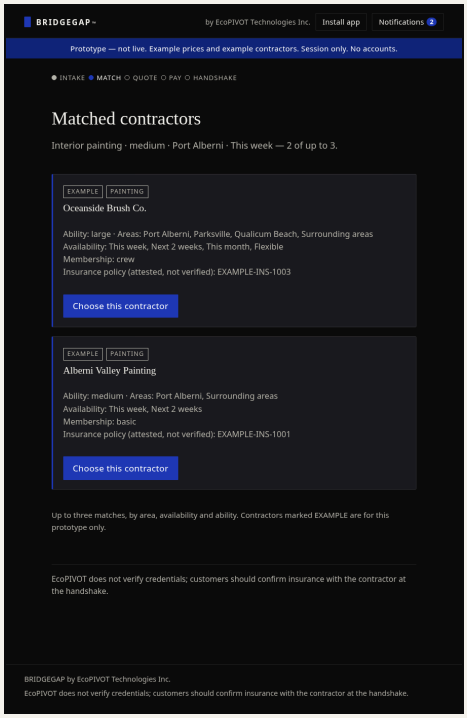

If a contractor does not do the job, come back for a fresh quote on the same job or the next one. That re-quote is free.

Working prototype

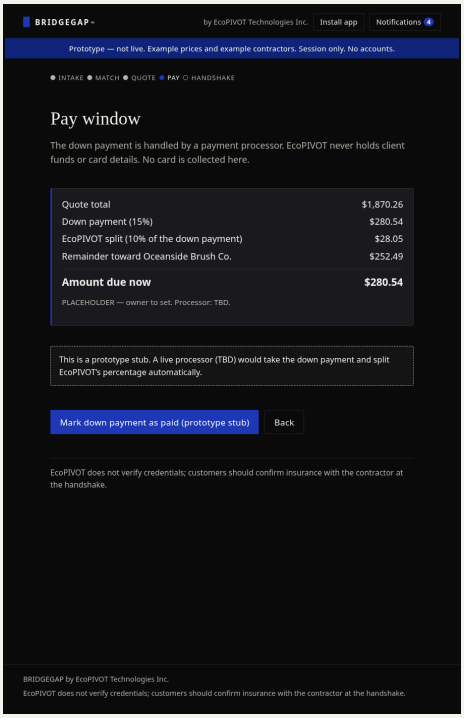

Working prototype, example data. The screens below use example contractors, prices, and names. They are not live accounts.

01 · Home. Working prototype, example data. Start as a customer.

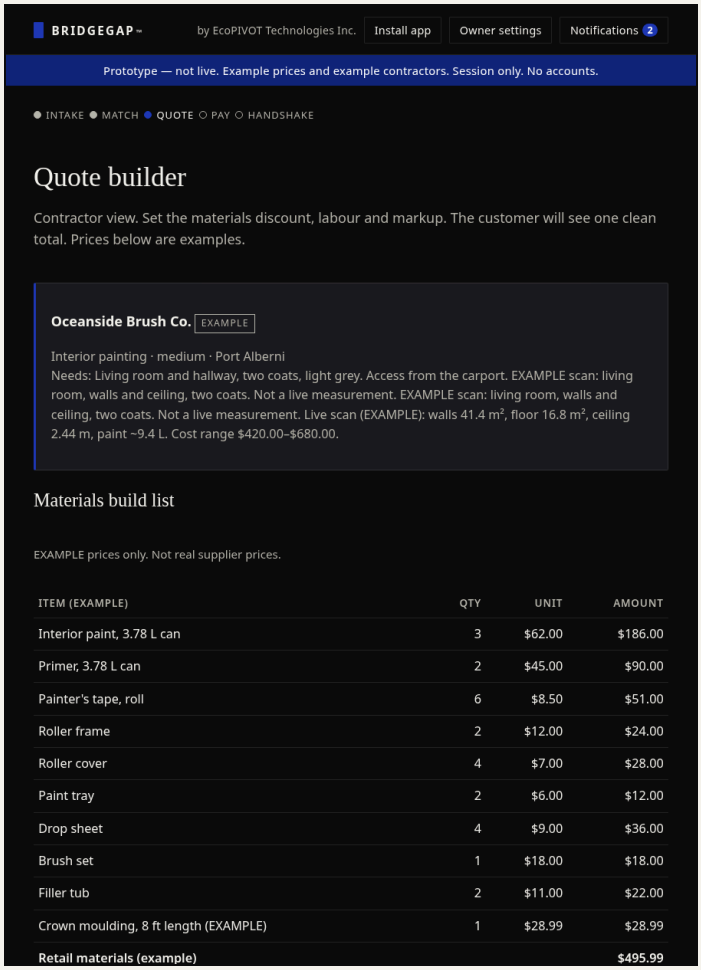

02 · Matches. Working prototype, example data. Up to three local contractors, by area, availability, and ability.

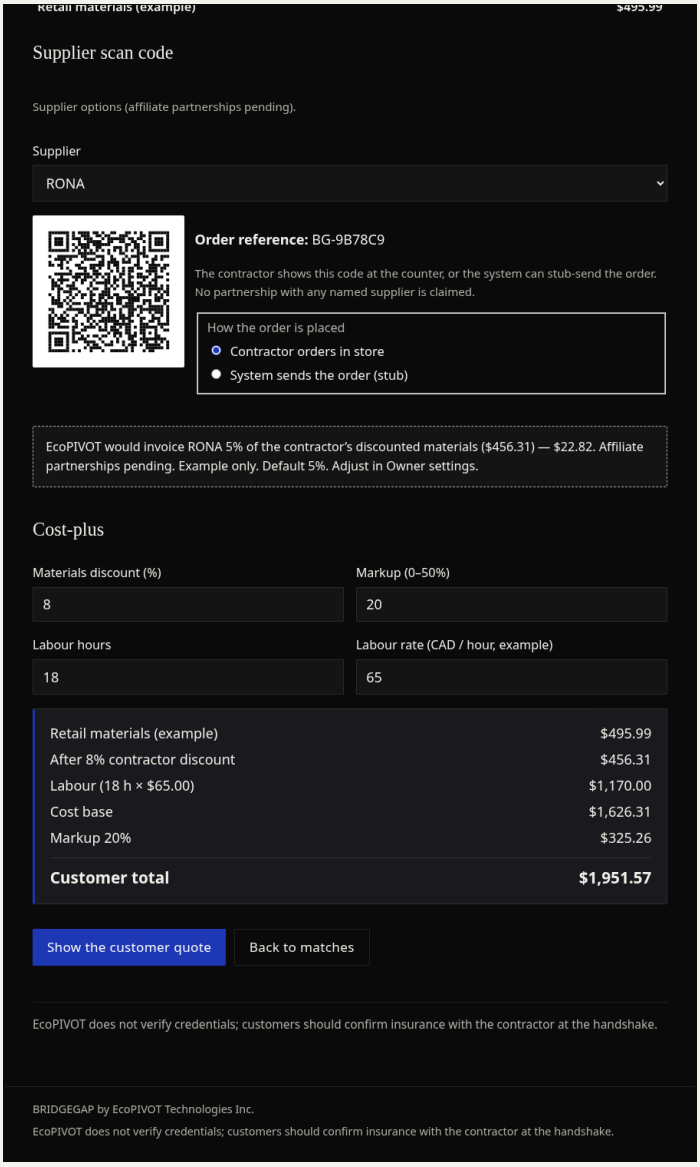

04 · Pay window. Working prototype, example data. The deposit goes through a payment service. EcoPIVOT never holds client funds or card details. Figures are examples.

Your quote

Working prototype, example data. One screen, shown in two parts so the materials list and the total remain readable. You see one clean quote. Prices are examples.

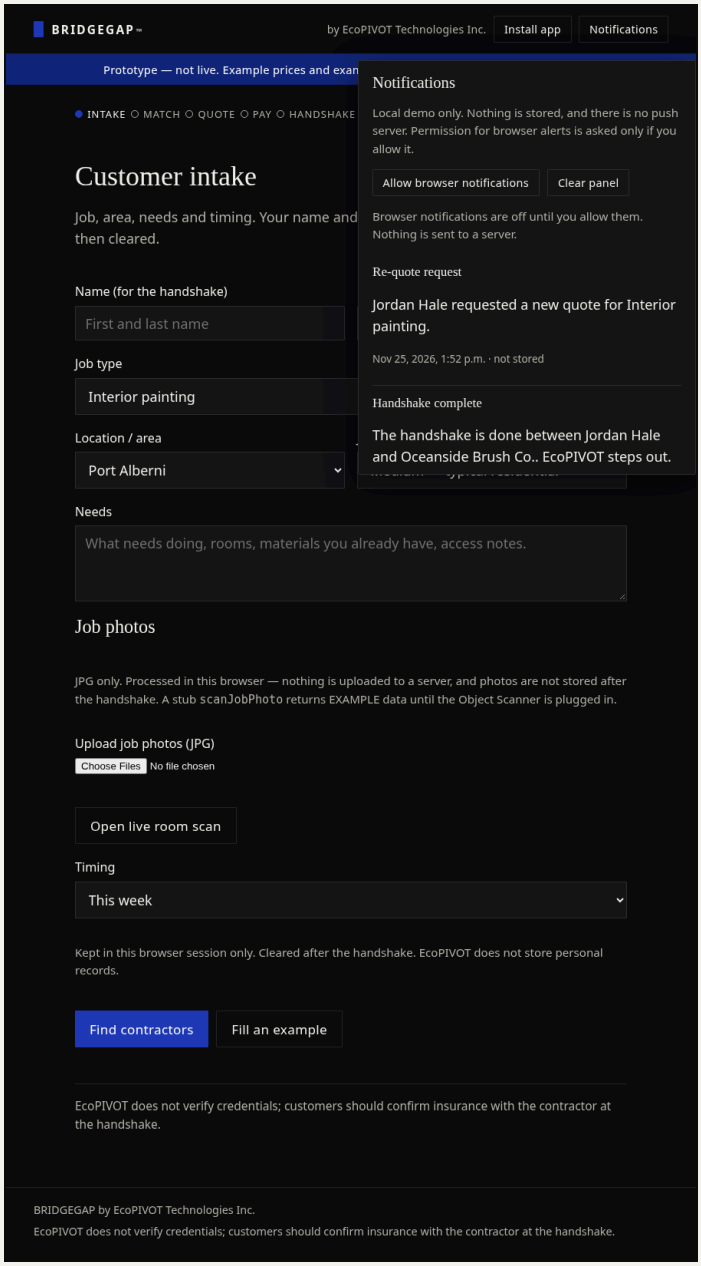

03 · Quote and materials, part 1. Working prototype, example data. Materials and labour, at the price the contractor sets. You see one clean total.

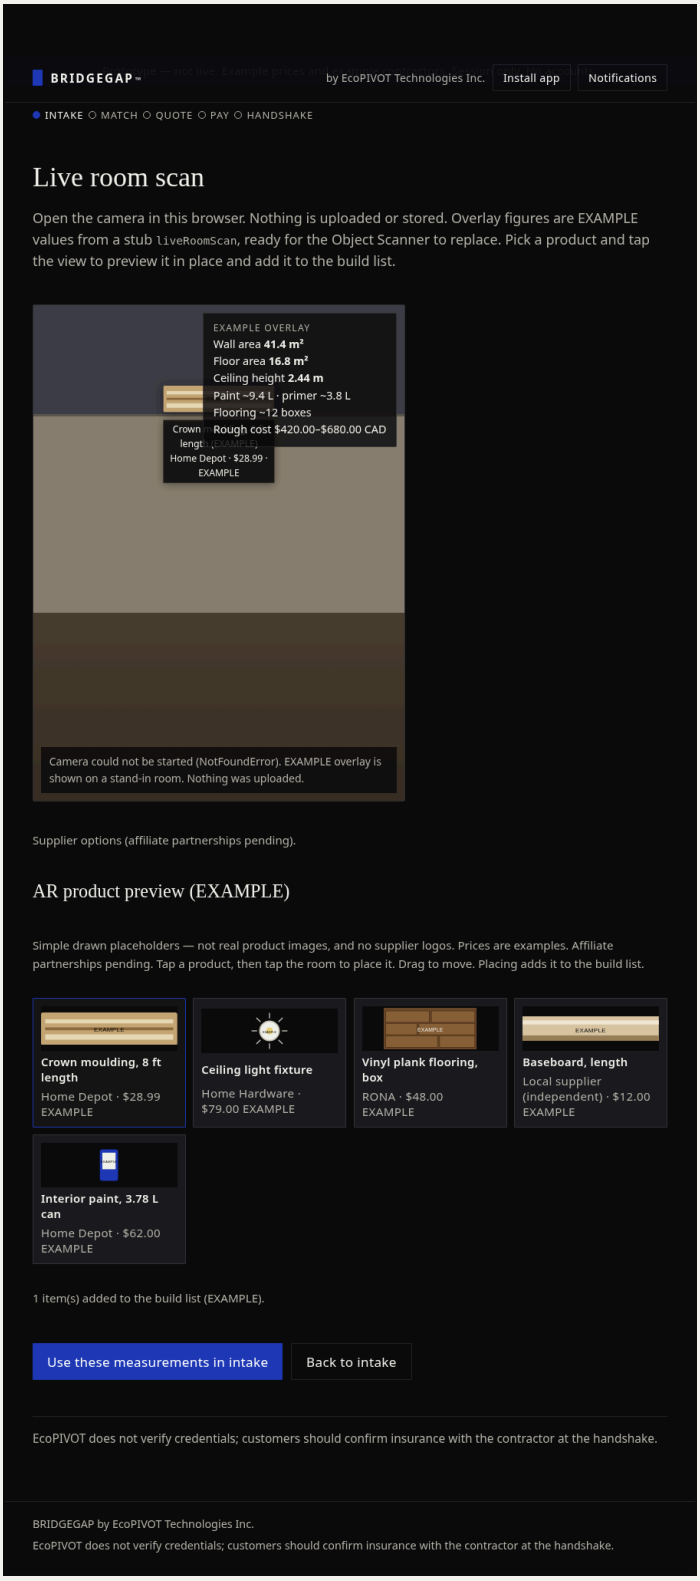

03 · Quote and materials, part 2. Working prototype, example data. The quote total, with a scan code the contractor uses at a partner supplier. Partnerships pending. Prices are examples.

Intake, live scan, and AR preview

Working prototype, example data. The live scan uses example overlay values; nothing is uploaded or stored. Product previews are examples, with supplier names as text only. Partnerships pending.

05 · Intake and notifications. Working prototype, example data. Tell us the job, then get updates when a quote is ready, a deposit is paid, or a handshake is complete.

06 · Live room scan and AR preview. Working prototype, example data. Example measurements and product previews. Supplier names are text only; partnerships pending. No supplier logos.
