INVESTOR PACKAGE · 25 NOVEMBER 2026

BRIDGEGAP™

by EcoPIVOT Technologies Inc.

A matching and quoting phone app for small towns. The customer gets one clean quote. The contractor gets a customer for life. After the handshake, EcoPIVOT steps out.

Prototype in build Phone app — internet-based and paperless Port Alberni, Parksville, Qualicum Beach and surrounding areas, Vancouver Island, B.C.

IN THIS PACKAGE

01 The brief
The problem, the model, how it earns, and what EcoPIVOT never holds.

02 Three offers
How the platform serves contractors, customers, and suppliers.

03 Working prototype
App screens from the current build. Example data only.

04 Market comparison
Membership versus per-lead and percentage-of-job models. Prices to be finalised.

05 File the name now
CIPO 2026 trademark fees, as an immediate funding need.

EcoPIVOT Technologies Inc. · One Canadian patent application pending (CA 3,287,042). This package does not project revenue or return. Trademark search is a first check, not a legal clearance. Supplier names are listed as text only; partnerships are pending.

PART 1 · THE BRIEF

BRIDGEGAP™

Why local customers and contractors need a better handshake, how the platform earns, and why filing the name now is an immediate funding need.

The problem

In small towns, finding a reliable, insured contractor and a fair quote is harder than it should be. Good local contractors struggle to find steady customers. Local suppliers try to compete with big-box stores and often lose the order.

BRIDGEGAP™ is EcoPIVOT Technologies Inc.'s answer: a matching and quoting platform. The customer gets one clean quote. The contractor gets a customer for life. After the handshake, EcoPIVOT steps out. It is a phone app, fully internet-based and paperless: intake, quotes, build lists, scan codes, and invoices are all digital.

File the name now

AN IMMEDIATE FUNDING NEED

File before January 1, 2027

Canada's trademark fees rise 1.7% on January 1, 2027. Filing the two core classes online in 2026 costs $640.10. Adding a third class brings the total to $789.14. There is no separate registration fee, and a registration lasts 10 years.

CLASSES 42 AND 35	CLASSES 42, 35, AND 37
$640.10	$789.14

Figures are official CIPO 2026 online fees, not projections.

A search of the Canadian Trademarks Database for "bridgegap" on November 25, 2026 returned 0 results. This is a first check, not a legal clearance. No contractor-matching platform was found under the name. It is used by unrelated consultancies: a Texas construction and insurance appraisal firm, a Toronto medtech consultancy, and an HR firm in Nigeria.

FILING	2026 ONLINE FEE
First class	$491.06
Each additional class	$149.04
Classes 42 and 35	**$640.10**
Classes 42, 35, and 37	$789.14
From January 1, 2027	First class $499.41; each additional $151.57

Class 42 covers the software platform. Class 35 covers connecting customers with contractors. Class 37, if added, covers building and repair services.

How it works

1. **The customer describes the job**
   An intake covers the work, location, needs, and timing.
2. **The contractor describes the business**
   Trade, ability, service area, availability, and an insurance policy number given on the contractor's honour.
3. **The system matches up to three contractors**
   Matching is by location, availability, and ability.
4. **One clean quote**
   The system builds the materials list. The contractor sets a cost-plus price. The customer sees one quote.
5. **The customer pays the down payment**
   Payment goes through a payment service. EcoPIVOT's percentage splits off automatically. That percentage is to be set.
6. **The handshake**
   Once it is paid, contact passes directly between customer and contractor. EcoPIVOT steps out.
7. **A customer for life, or a fresh quote**
   If the work goes well, the contractor keeps that customer. If the contractor fails, the customer comes back for a new quote.

Each quote also produces a materials build list with a scan code for a partner supplier. The contractor gets a discount and sets the materials price the customer sees. The contractor orders at the store, or the system sends the order in, and the supplier pays EcoPIVOT a percentage by invoice.

BRIDGEGAP™ is a phone app. It notifies customers and contractors when a new job matches, a quote is ready, a quote is accepted, a deposit is paid, the handshake is complete, or a re-quote is available. Clear updates mean less chasing and less uncertainty for customers, and steadier, more predictable work for contractors. That is peace of mind on the customer side, and a more stable book of work for the contractor.

Environmental benefits

1. Paperless: intake, quotes, build lists, invoices, and bills are all digital.
2. Fewer site-visit and cold-call driving trips, so less gas consumption and less traffic, because intake and quotes happen online and matching is local.

These benefits are the basis for possible environmental incentives and offsets. That stream is being explored and is not yet measured or confirmed. This brief does not claim eligibility and gives no figures. Offsets and green grants require measured, verified reductions.

How it earns

Four streams are part of the model. Percentages, membership price, and partner terms are still to be set or finalised. This brief does not project revenue.

Contractor memberships

Contractors pay to belong to the platform. Working prices, adjustable and to be finalised, are Basic $29/month, Pro $59/month, and Crew $99/month, with no per-lead fees. Annual plans are priced at 10× monthly: $290, $590, and $990.

Affiliates

Partner arrangements around the materials list and related referrals. Terms are to be set.

Share of the down payment

After the quote is paid through a payment service, EcoPIVOT's percentage splits off automatically. The percentage is to be set.

Supplier commission on materials

The supplier pays a commission by invoice on materials orders that are placed. The rate is to be set.

BEING EXPLORED — UNCONFIRMED

Environmental incentives and offsets

A possible fifth stream, based on the environmental benefits above. It is being explored and is not yet measured or confirmed. This brief does not claim that the platform or its users would be eligible. Offsets and green grants require measured, verified reductions. No figures are given here.

Launch area

The first market is Port Alberni, Parksville, Qualicum Beach, and the surrounding areas on Vancouver Island, B.C.

Supplier options under discussion are Home Depot, Home Hardware, RONA, and local independent suppliers. These names are listed as text only. All partnerships are pending. No agreement or endorsement is implied.

An AR glasses hardware partner is in early discussions. The partner is not named here.

What EcoPIVOT never holds

No records, no client money
EcoPIVOT never holds client money, card details, stored records after the handshake, or credential documents. The payment service handles the down payment and the split.

- No client money — a payment service collects the down payment and splits off EcoPIVOT's share.
- No card details.
- No stored customer or contractor records after the handshake.
- No insurance or other credential documents. The contractor attests to a policy number; the customer is asked to confirm it at the handshake.

EcoPIVOT does not verify credentials. Customers should confirm insurance with the contractor at the handshake.

Where things stand

Status as of November 25, 2026, America/Vancouver.

COMPANY	EcoPIVOT Technologies Inc.
PRODUCT	BRIDGEGAP™
FORMAT	Phone app — internet-based and paperless
STATUS	Prototype in build
LAUNCH AREA	Port Alberni, Parksville, Qualicum Beach and surrounding areas, Vancouver Island, B.C.

- ☐ Prototype in build
  Under way, not yet ready to launch
- ☐ Sign the first 10 to 20 contractors
- ☐ Approach one supplier
- ☐ Set the down-payment percentage and finalise the membership price
- ☐ File the trademark
  Before January 1, 2027, to keep 2026 fees

PART 2 · THREE OFFERS

Contractors, customers, and suppliers

One platform, three sides of the same handshake. Membership prices below are working figures, adjustable and to be finalised.

FOR CONTRACTORS

Steady local customers, and you keep their details

You do good work. The hard part is finding the next customer. BRIDGEGAP™ brings you local jobs in Port Alberni, Parksville, Qualicum Beach, and the surrounding area, then hands the customer to you once the quote is paid. If you do the job well, that customer is yours for life.

HOW IT WORKS

- You enter your trade, ability, area, availability, and insurance policy number, on your honour.
- When a job matches, you are one of up to three local contractors the customer can consider.
- The system builds the materials list. You set a cost-plus price. The customer sees one clean quote.
- Once the down payment is paid, you get the customer's contact details directly. EcoPIVOT steps out. You keep that information.

MATERIALS AND MEMBERSHIP

The build list carries a scan code for a partner supplier. You get a discount and set the materials price the customer sees. Order at the store, or have the system send the order in.

A contractor membership is required. Working prices, adjustable and to be finalised: Basic $29/month, Pro $59/month, and Crew $99/month. Annual plans are priced at 10× monthly: $290, $590, and $990. No per-lead fees. One contractor per job.

UPDATES ON YOUR PHONE

You get a notification when a new job matches, when a quote is ready or accepted, when a deposit is paid, when the handshake is complete, and when a re-quote comes in. Clear updates mean less chasing and less uncertainty, so your work is steadier and more predictable, and customers have more peace of mind.

FOR CUSTOMERS

One clean quote, then you deal with the contractor directly

In a small town, finding a reliable, insured contractor and a fair quote can take more time and trust than it should. BRIDGEGAP™ gives you one clean quote from up to three local contractors in Port Alberni, Parksville, Qualicum Beach, and the surrounding area.

HOW IT WORKS

- Tell us the work, where it is, what you need, and when.
- Up to three local contractors are invited to quote, by location, availability, and ability.
- You see one clean quote — materials and labour, at the price the contractor sets.
- You pay the down payment through a secure payment service. EcoPIVOT never sees your card details.
- Once it is paid, you and the contractor get each other's contact details. From there, you work together. EcoPIVOT steps out.

INSURANCE, IN PLAIN TERMS

Contractors enter their insurance policy number on their honour. EcoPIVOT does not verify credentials. You should confirm insurance with the contractor at the handshake.

IF A CONTRACTOR FAILS

Come back for a fresh quote on the same job or the next one. That re-quote is free.

UPDATES ON YOUR PHONE

You get a notification when a quote is ready, when a quote is accepted, when your deposit is paid, when the handshake is complete, and when a re-quote is available. Clear updates mean less chasing and less uncertainty — peace of mind while you wait — and steadier, more predictable work for the contractor.

FOR SUPPLIERS

Scan-coded orders, commission only when an order is placed

Local and regional suppliers on Vancouver Island compete with big-box stores for contractor business. BRIDGEGAP™ turns each accepted quote into a materials build list with a scan code, so the order can come to you.

HOW IT WORKS

- A contractor sets a quote. The system builds the materials list.
- The list carries a scan code tied to a partner supplier.
- The contractor orders at your store, or the system sends the order in.
- You pay a commission by invoice, only on orders that are placed. The rate is to be set.

WHO THIS IS FOR

Local independent suppliers and regional suppliers who want contractor orders in Port Alberni, Parksville, Qualicum Beach, and the surrounding area.

PARTNERSHIPS PENDING

Supplier options under discussion include Home Depot, Home Hardware, RONA, and local independent suppliers. These names are listed as text only. All partnerships are pending. No agreement or endorsement is implied. This page does not project order volume or income.

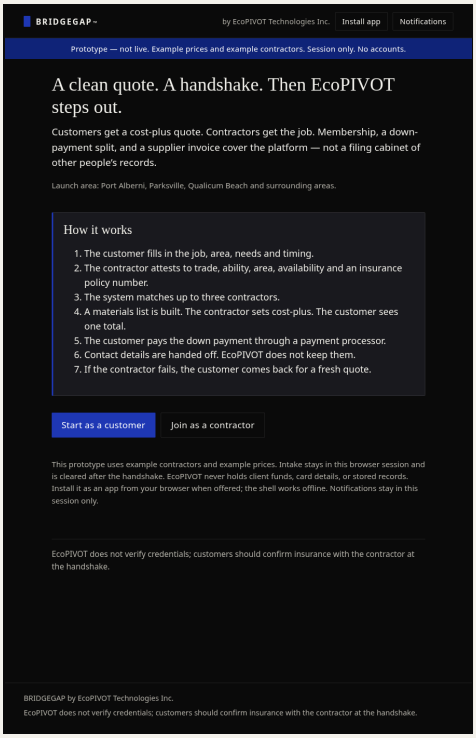

The platform is fully internet-based and paperless. Possible environmental incentives and offsets based on paperless work and fewer driving trips are being explored and are not yet measured or confirmed. No eligibility is claimed, and no figures are given.

PART 3 · WORKING PROTOTYPE

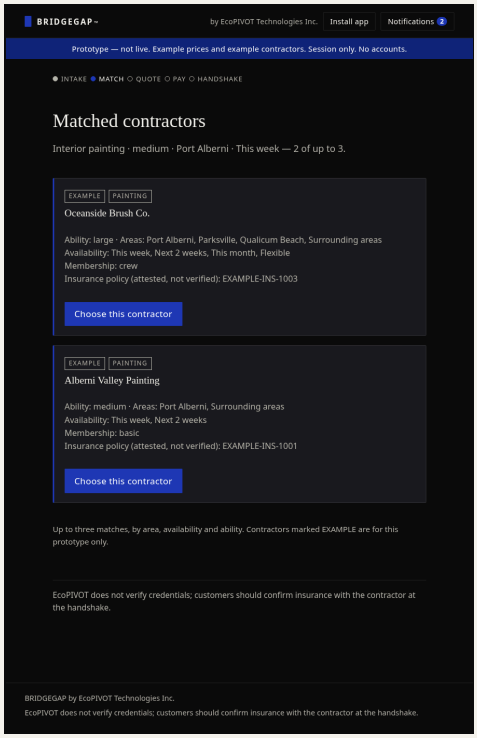

App screens

Working prototype, example data. The screens below use example contractors, prices, and names. They are not live accounts, and figures shown in the prototype are placeholders, not final fees.

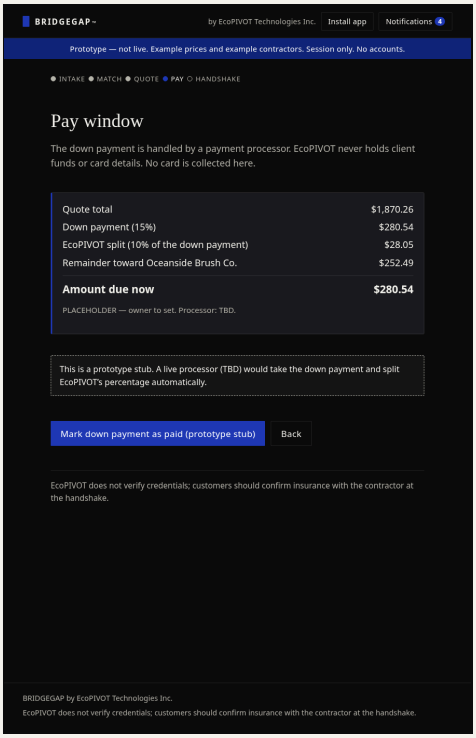

Working prototype, example data. Prototype — not live. No third-party logos are used. Supplier names appear as text only, with partnerships pending.

01 · Home. The opening screen. Start as a customer or join as a contractor.

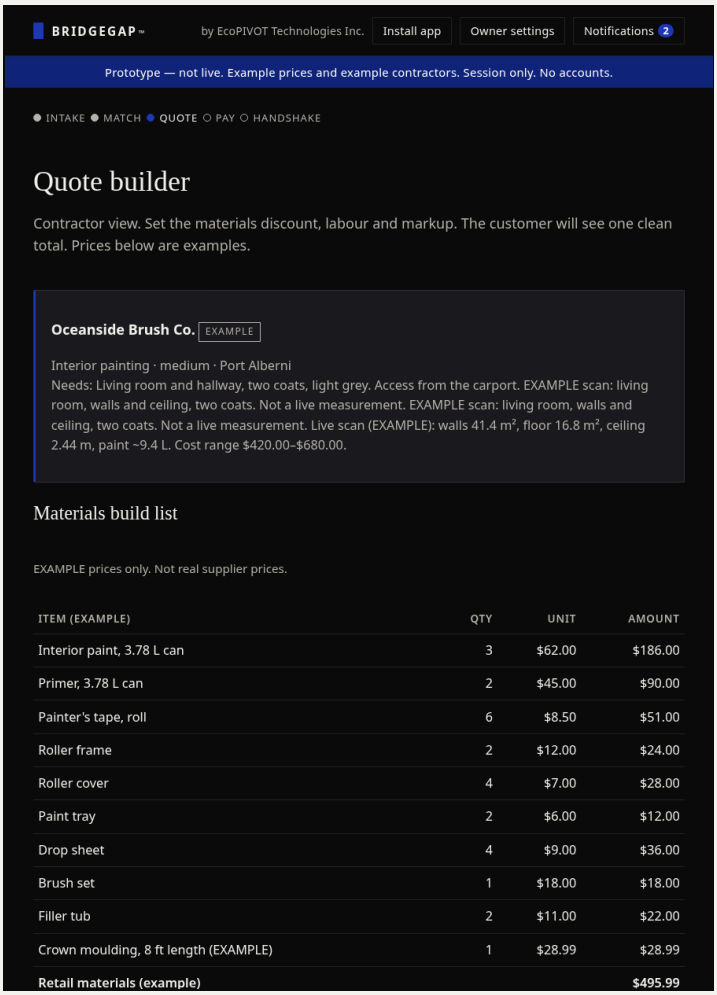

02 · Matches. Up to three local contractors, by area, availability, and ability. Example contractors only.

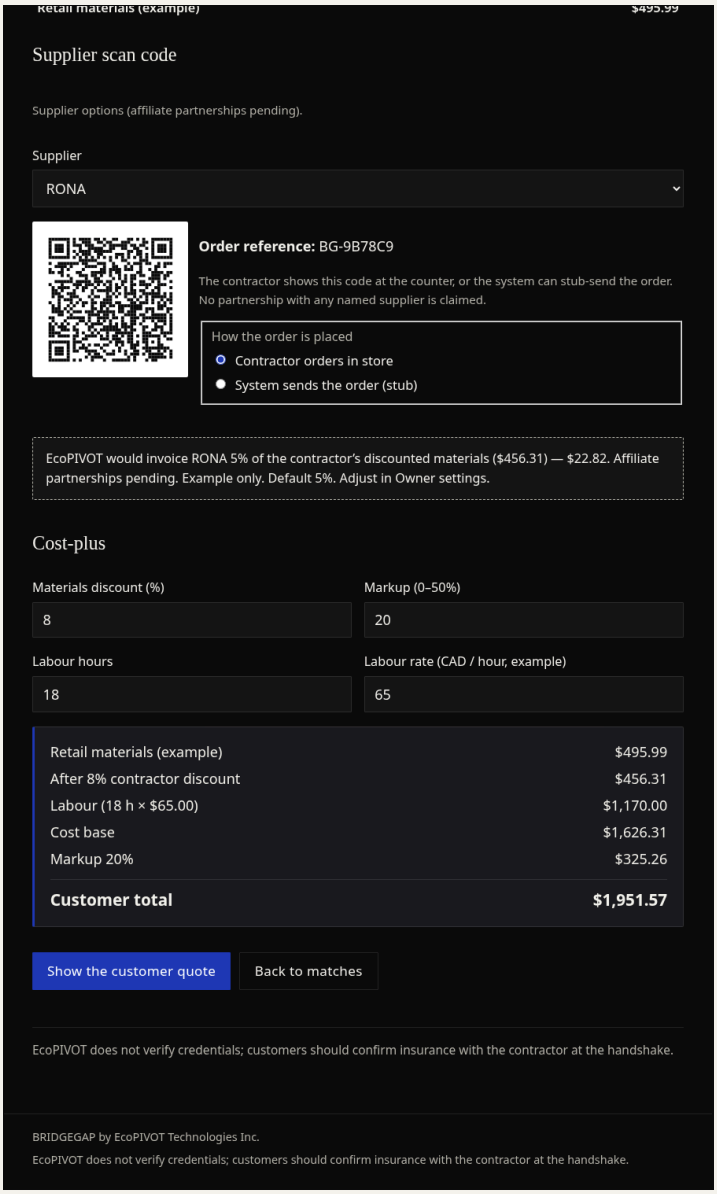

04 · Pay window. The down payment is handled by a payment service. EcoPIVOT never holds client funds or card details. Figures are examples.

Quote, materials, and scan code

Working prototype, example data. One screen, shown in two parts so the build list and the scan code remain readable.

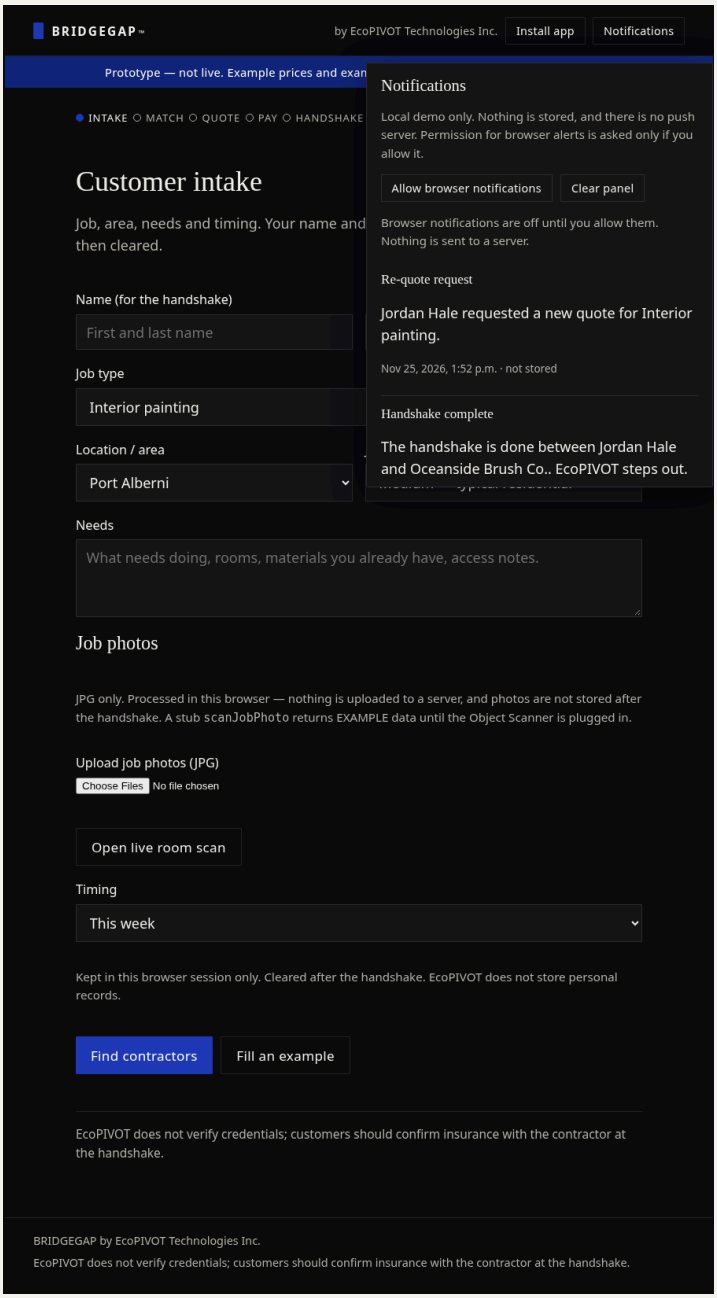

03 · Quote builder, part 1. The contractor sets materials, labour, and markup. The customer will see one clean total. Prices are examples.

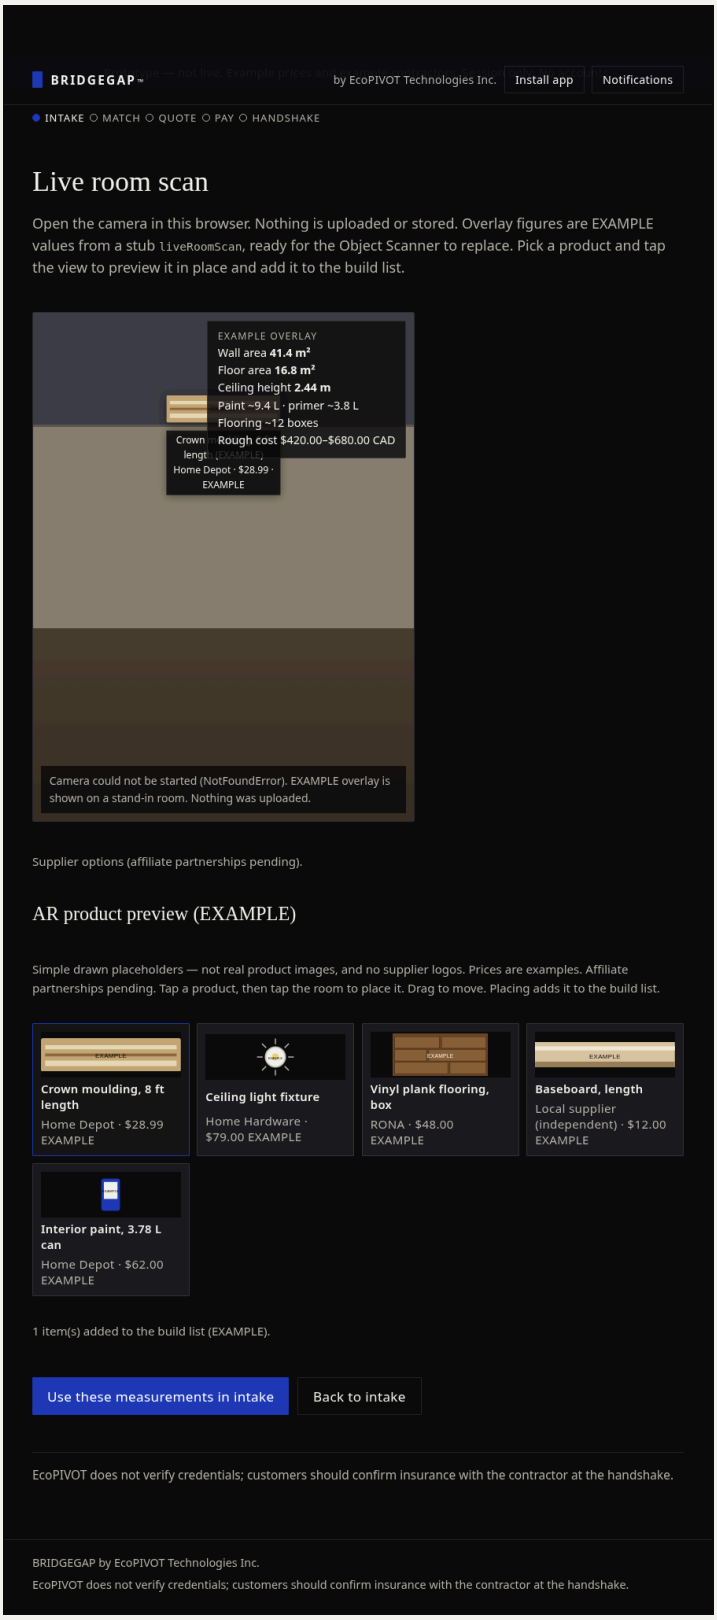

03 · Quote builder, part 2. A scan code for a partner supplier, and the cost-plus total. Supplier options are partnerships pending.

Notifications and live scan

Working prototype, example data. Notifications in this prototype stay in the session only. The live scan uses example overlay values; nothing is uploaded or stored.

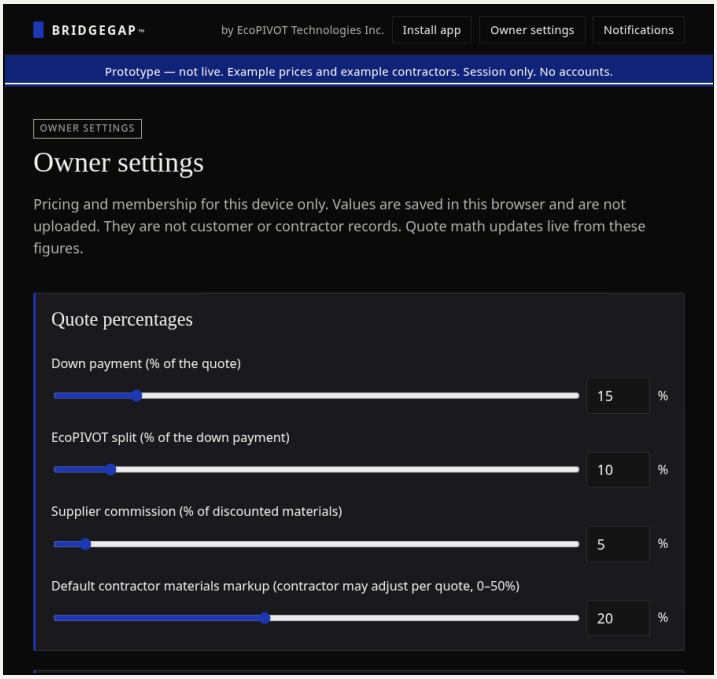

05 · Notifications. Updates such as a re-quote request or handshake complete. Clear updates mean less chasing and less uncertainty — peace of mind while you wait, and steadier work for the contractor.

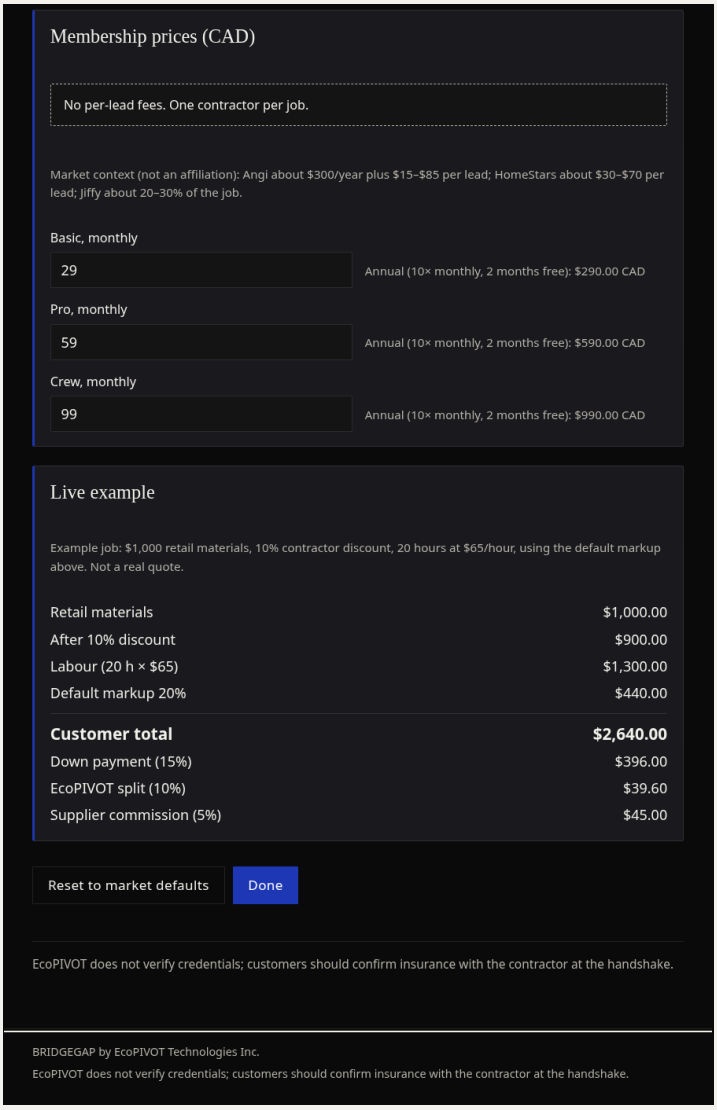

06 · Live room scan. Example measurements and product previews, with supplier names as text only. Partnerships pending. No supplier logos.

Owner settings and membership

Working prototype, example data. Quote percentages and the live example in this screen are placeholders, not final fees. Membership prices shown here are working figures, adjustable and to be finalised.

07 · Owner settings, part 1. Working prototype, example data. Down-payment, split, commission, and default markup controls are placeholders for the owner to set. They are not final fees.

07 · Owner settings, part 2. Working prototype, example data. Membership tiers: Basic $29, Pro $59, and Crew $99 per month. Annual plans are 10× monthly: $290, $590, and $990. No per-lead fees. One contractor per job. Prices to be finalised.

PART 4 · COMPARISON AND FILING

Market comparison

How other platforms typically charge, set beside a membership model with no per-lead fees. BRIDGEGAP prices are working figures, adjustable and to be finalised. This package does not project revenue or return.

PLATFORM	HOW THEY CHARGE	NOTES
Angi	About $300/year, plus $15–85 per lead	A commonly cited membership-plus-lead model. Fees may vary by market and plan.
HomeStars	About $30–70 per lead	Contractor-reported range. Not an official published schedule, and may vary.
Jiffy	20–30% of the job	A percentage of the job value, rather than a lead fee.
BRIDGEGAP™	**Membership: Basic $29/month, Pro $59/month, Crew $99/month. Annual (10× monthly): $290, $590, $990. No per-lead fees.**	**Prices are adjustable and to be finalised. Up to three contractors may be invited to quote; after the customer pays, one contractor takes the job. The lead is not sold to a list of bidders.**

Typical Canadian materials markup is 15–25%, according to 2026 contractor guides. In BRIDGEGAP™ the contractor sets the cost-plus price, including the markup the customer sees. That range is industry context, not a platform fee and not a projection.

Competitor figures are commonly cited or, where noted, contractor-reported. They are not audited by EcoPIVOT and may change. This comparison is not a valuation and does not forecast take-up or return.

File the name now

AN IMMEDIATE FUNDING NEED · CIPO 2026 ONLINE FEES

File before January 1, 2027

Canada's trademark fees rise 1.7% on January 1, 2027. The first class, filed online, is $491.06. Each additional class is $149.04. Classes 42 and 35 together are $640.10. Adding class 37 brings the total to $789.14. There is no separate registration fee, and a registration lasts 10 years. From January 1, 2027, the first class is $499.41 and each additional class is $151.57.

FIRST CLASS	EACH ADDITIONAL CLASS	CLASSES 42 AND 35	CLASSES 42, 35, AND 37
$491.06	$149.04	$640.10	$789.14

Figures are official CIPO 2026 online fees, not projections. A search of the Canadian Trademarks Database for "bridgegap" on November 25, 2026 returned 0 results. That is a first check, not a legal clearance.
